SPECIAL EDITION

Artist Statement

Allegra is an Italian artist, explorer of cultures, in a constant motion searching for deepest roots. Traveling between countries, from East to West, experiencing customs, looking for meeting grounds, observing who, when and how they intermingle.

Sea, feminine and travel archetypes are constant in her early oneiric works. Her current research deals with Retinal Images: what can you see when you close your eyes? She does represent her personal vision by means of an abstract/organic improvisation. Primeval and new symbols are emerging from this research.
